CEY GRUP[®]

[about us]

The story of **Cey Group** started in **1977** with the production of cleaning cloths by Memet Ceyhan in a small workshop in the Gand Bazaar Astarçı Han, Beyazıt, İstanbul.

With **Ertuğrul Ceyhan**'s joining the management in **1999** and the company's change into a limited liability company, the first steps towards becoming an institution were taken.

Cey Group, which rapidly developed its commercial activities since then, moved to its **8.000** m² factory in the district of Tasoluk / Arnavutköy.

Cey Group, owing to the importance it attaches to product development and innovation, became one of the most important manufacturers of the industrial cleaning sector in Turkey in a short time.

Cey Group, producing high quality and durable cleaning tools and equipment required by the public and private sector

organizations it serves with the principle of "**always customer satisfaction**" has succeeded in becoming one of the important brands of the domestic cleaning sector by constantly renewing itself both on product basis and in the field of production technology.

Cey Group has been developing itself with investments in injection systems, molds and weaving machines since **2010**, in this way, while increasing its production capacity and quality, it has reached a production capacity that can easily respond to the increasing customer demands in the country.

Cey Group, aims to be an organization that sets the standards in the industrial cleaning industry, with the high-quality cleaning equipment it produces and the importance it attaches to customer satisfaction, in Turkey and in all the other countries it serves.

Dear Solution Partners,

We would like to present to you our latest catalog of **Ceymop Professional** products. We aspire to be your solution partner with the professional cleaning systems we offer for the cleaning of hospitals, hotels, schools, buildings and many areas.

The main subject of this catalog is not our products, but you. After all, your needs and commercial success are at the center of all the products we produce and offer.

Therefore, all **Ceymop Professional** products have been developed as a result of the close relationships we have established with our customers. Your feedback and requests are our key factor in product development.

The products in this catalog are the reflections of your feedback and requests.

Cey Group aims at customer-oriented success. Ever-increasing cost pressures and high-quality standards are the most

important stress related areas where our customers operate. For this, we see it as our most important job to create potentials that will increase the productivity of our customers. In this sense, our key criteria are flexibility and sustainability. That's why we take care that all our solutions are in perfect harmony with each other. We pay the utmost attention to this in our designs and products.

Cey Group aims to be one of the leading manufacturers of our country and to offer international quality products and systems to its customers. We will continue to fulfill the highest standards, especially in the industrial cleaning sector, with the solutions we offer as we did before. In doing so, we will always carefully examine the current situation and continually improve our product range and products.

In today's world, where even the best things can be improved, we will continue to work to offer you the best.

Sincerely yours

Ertugul CEYHAN
Chairman of the Board

VISION

To be a solid, honest, reliable supplier always considering customer needs and providing them with original solutions in the national and international industrial cleaning sector.

MISSION

To create added value by producing the highest level of technology-oriented service and original solutions in the industrial cleaning sector; to provide these services and solutions to the international cleaning industry and commercial markets.
